

OUTSOURCING DEVELOPMENT

HOW IT WORKS BEST

HAVE YOU CONSIDERED OFFSHORING FOR YOUR NEXT DEVELOPMENT PROJECT?

Many companies are under constant pressure to continually improve their current services or develop new platforms and features. Incorporating an offshore team can help to decrease labor costs, while ensuring continued top-line growth. Combine the company knowledge and expertise of in-house IT talent with a team of resources to work side-by-side with you, on your time.

Completing your next development project THE KEYS TO SUCCESS

1.

Define requirements, establish a budget, and set a timeframe for completion of the project

2.

Build and/or assign a team with the right skills to get the project done according to specifications

3.

Develop, test, and release a final product that will improve your business and stay within budget

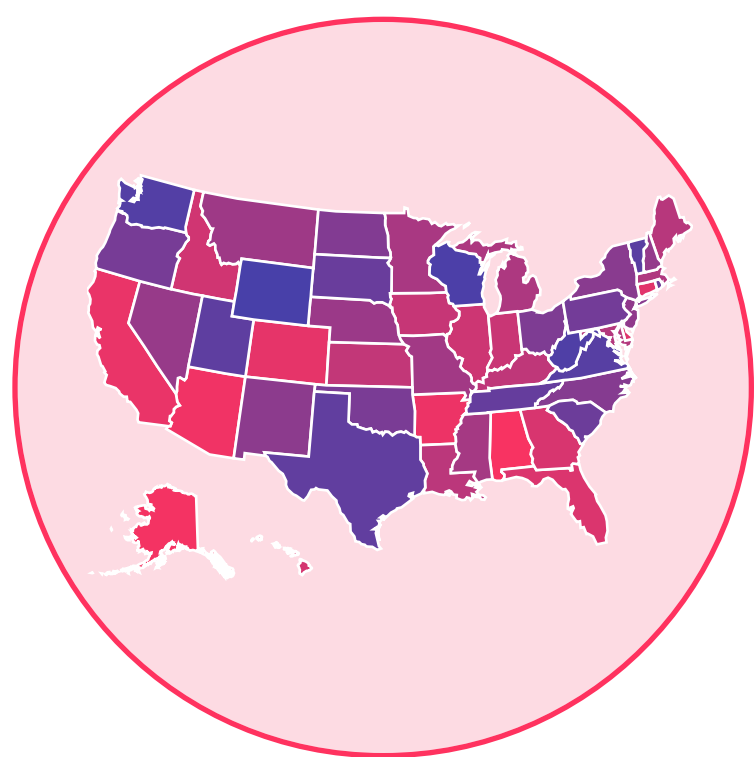

THE EXAMPLE - JAVA Development Project XYZ

Budget: \$750,000 / Time: 1 year (1,850 hours)

Now you have a choice:

US TEAM

Recruit/hire a team in the US to handle all functions of development

1 Salaried Lead JAVA Developer in US
\$130K

2 JAVA Developers - \$122/hr each
1 QA - \$86/hr

Total Annual Cost - \$740,500

of New Team Members - 3

COMBINED TEAM

Combine in-house developers with talented offshore developers to provide a more productive, cost effective team

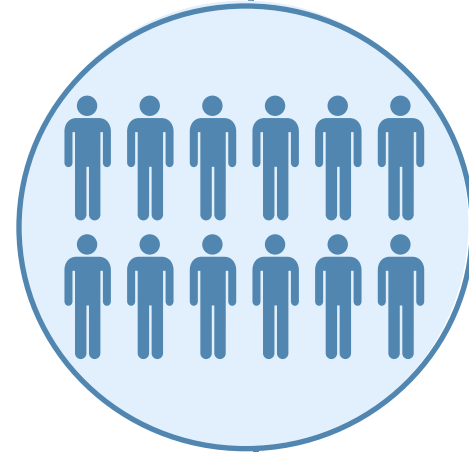

1 Salaried Lead JAVA Developer in US
\$130K

10 JAVA Developers in Phil. - \$28/hr each
2 QA's in Philippines - \$23/hr each

Total Annual Cost - \$733,100

of New Team Members - 12

OR

Using an offshore team combined with an in-house developer provides: company focus, 4X the brainpower, lower costs, and the team you need to succeed!
